

# 10 things to check on your fire doors

1. Look for a label, a plug or similar marking to show that it's certificated
2. Make sure the door leaf isn't damaged, warped or twisted
3. Ensure it closes correctly around all parts of the frame
4. Check that the closer shuts the door onto the latch from any position – we suggest about 75mm from the closed position
5. Check the gap around the door frame is constant and around 3 to 4 mm
6. Check the hinges are firmly fixed into the door and frame with no missing screws
7. Ensure that the seals at the top and sides of the door are not damaged or missing
8. Make sure any glass and the beads holding the glass are fitted firmly
9. Make sure the door is not wedged or propped open
10. Check that the door is marked correctly with appropriate signage
